Healthcare-IT as a Service (HMS)

Intelligent, scalable, end-to-end Healthcare-IT platform connecting Providers, Partners & Patients with 48+ modules on a Pay-as-you-go model. Subscription-based, cloud-native (true SaaS) and fully interoperable — replacing siloed, high-capex legacy systems.

Vision

Digitise healthcare infrastructure & maintain a life-time digital health profile for every citizen.

Why Drucare?

Affordable, Accessible & Amalgamated System — the need of the hour.

Subscription Pricing

Pay-as-you-go vs high capex legacy software.

Unified & Interoperable

One platform vs multi-vendor siloed systems., 48 Modules for various purposes

Configurable & DIY

Better UX vs complex, high-touch tools.

True SaaS

On-Premise and Cloud-based deployments , not client-server local deployment.

Govt & Hospitals

Experience Govt Projects – Like Karnataka, Pondichery, Dehradun, etc.

Global Presence

Global Presence with serving abroad countries, like Vietnam, Srilanka, Dubai & Singapore

Real-time monitoring across one consolidated state-wide healthcare platform — built for highest-rated adaptability and scale.

NETRAA

Security & Compliance Platform (Relyx / Fineagle)

Unified security and compliance tools that protect your entire IT estate — real-time risk assessment, automated compliance, and robust access controls within one data-driven platform. Turns security governance into a daily-workflow advantage.

Tagline

"Turning Risk into Resilience."

Netraa — Key Capabilities

Including AI-enabled security posture management for infrastructure & quantum computing (Kuvanest-TOM).

Unified Compliance Mgmt

Centralized monitoring & policy enforcement across the IT estate.

Real-Time Risk Assessment

Continuous evaluation of threats for proactive mitigation.

Automated Compliance

Built-in, reusable frameworks for regulatory standards.

Access Control & Data Protection

Robust auth, authorization and data safeguarding.

Data Sovereignty & DDoS Defense

Cross-region/cloud security, encryption with KMS auth keys.

Digital Twin Impact Analysis

Chaos-monkey style resilience testing for AI systems.

Channel Partner: AWS — secure hybrid cloud, cross-border data transfer & compliance support.

e-Vyaasa

IT-Powered Gurukula Ecosystem (LMS)

A Gurukula-inspired digital learning platform combining the wisdom of traditional education with AI, AR/VR, and a robust Learning Management System. Offers custom websites & apps for schools with ERP-based cloud integration — preserving heritage while embracing innovation.

For

Schools seeking a modern, immersive education ecosystem — academics, AR/VR, and analytics in one place.

e-Vyaasa Features

Future of education, powered by AI, AR/VR and a unified LMS.

Website Development

Engaging, user-friendly school websites tailored to your needs.

Complete LMS & Custom App Development

Custom mobile apps for seamless learning & management.

Parent-Teacher AI - Communication

Smooth, real-time interaction between parents and educators.

Student Progress Tracking

Monitor academic growth with detailed performance reports.

AI Chatbots

Instant, smart support for students, parents & teachers.

AR/VR for Science & Math

Immersive learning with interactive 3D experiences.

Related: e-Sadan — AR/VR real-estate planning platform for developers, architects & investors.

Next-Gen e-Commerce Platform

An e-commerce platform powered by AI, AR/VR and AIoT device integration. Built with GenAI for smarter product discovery and personalization, and recently partnered with IoT device-sellers to deliver a seamless smart-shopping ecosystem — from connected home devices to wearables.

Vision

Revolutionize how customers engage with technology through an intelligent, adaptive online marketplace.

Bliveus — Features

A curated, immersive global marketplace for niche categories.

Immersive AR/VR Shopping

Interactive 3D product views for a real-life shopping experience.

AI-Powered Recommendations

Smart search, personalized suggestions and trend insights.

Global Niche Marketplace

Curated platform for specialty foods, IoT electronics, real estate goods & medical products.

Digital Marketing Suite

Built-in SEO, automated promotions & analytics for vendors.

Secure Transactions & Order Mgmt

Integrated payment gateway with tracking and post-purchase support.

Kuvanest

Mini Datacenter (Netra-Dhara)

A modular data center solution for small, medium and large businesses, offering localized data storage with high speed throughput and performance. Netra delivers AI-based Traceability, Observability & Monitoring (TOM); Dhara delivers storage & VM subscription services up to GPUs, Hyperscalers and Quantum Computing.

Netra

Sovereign VDC TOM solution — AI-based security & compliance for local DCs and cross-border data transfers.

Kuvanest — Capabilities

Modular, localized, sovereign infrastructure — built for the quantum era.

Modular Datacenter Hardware

ScaleUp-MDC unit for small to large business deployments.

Localized High-Speed Storage

Data residency with strong throughput & performance.

VM & Storage Subscription

Offered to individuals through enterprise-class customers.

High-Level Computing Access

Subscription path to GPUs, hyperscalers & quantum computing.

Data Sovereignty & DDoS Defense

Cross-region/cloud/country PAM and encryption with KMS.

Digital Twin Impact Analysis

Chaos-monkey resilience modelling for AI infrastructure.

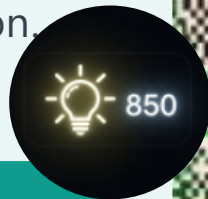

Hyperscaler Partner: AWS — hybrid cloud migration, integration & upgrade projects via vibe-coding (AI development).

SMELL2S

IoT & AI-Based Smart Farming

AI & IoT-enabled indoor farming systems with automation and real-time monitoring — connecting the physical and digital worlds. Intelligent control of irrigation, lighting, climate and nutrient delivery, with remote tracking of soil moisture, temperature, humidity and luminance for data-driven crop optimization.

Live Deployment

Powering VNS Farms hydroponics — real-time CO₂, light, water pH and temperature dashboards.

SMELL2S — Capabilities

Scalable from small-scale farms to commercial greenhouses.

SMELL2S

Our Expertise

AI & IoT-enabled indoor farming systems with automation and real-time monitoring.

Automation

Intelligent control of irrigation, lighting, climate and nutrient delivery.

Remote Monitoring

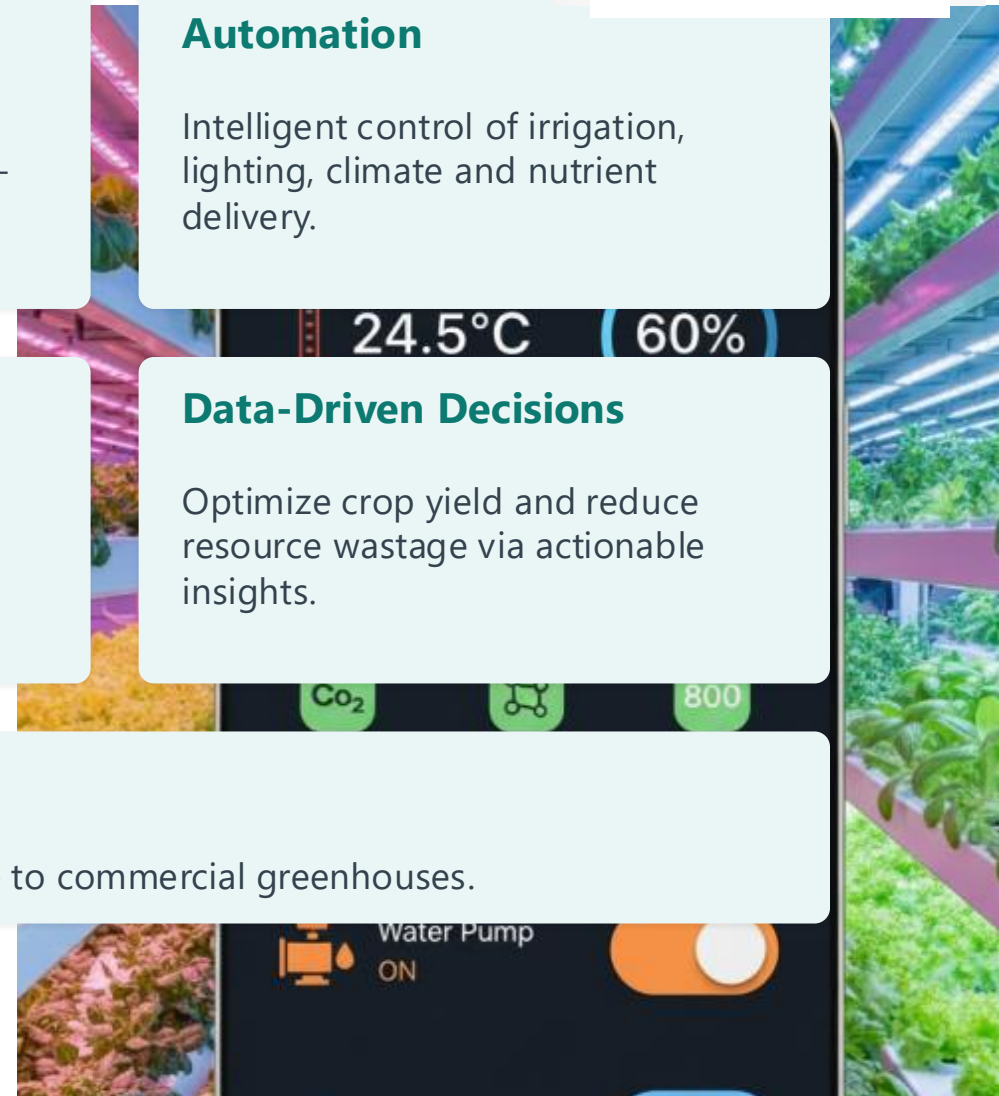

Track soil moisture, temperature, humidity & luminance remotely.

Data-Driven Decisions

Optimize crop yield and reduce resource wastage via actionable insights.

Scalable & Flexible

Designed for small-scale farms up to commercial greenhouses.

Brahmatics Pvt Ltd

Comprehensive, customizable & scalable AI and IT solutions — streamlining operations, boosting efficiency and driving growth across Healthcare, Security, Education, e-Commerce, Infrastructure and AgriTech.
